IT [ITF+]

FUNDAMENTALS COURSE [5-10 days/30 hours]

- Identify and explain basic computer components.
- Set up a basic workstation.
- Understand the basics of software.
- Properly install basic software.
- Apply troubleshooting skills.
- Learn basic network connectivity, wifi and lan settings.
- Understand safety and preventative maintenance of computers.

PRICE: R10900

A+ (Hardware) COURSE

[5 - 10 Days/30 hours]

- Motherboard, Processors and Memory
- Storage Devices & Power Supplies
- Peripherals, Expansions, Display Devices
- Installing & Configuring Printers
- Operating System Basics & System Administration
- Working with Windows Security, Mobile Devices
- Troubleshooting Theory, OS's & Security
- Hardware & Network Troubleshooting

PRICE: R10900

CLOUD+
COURSE
[5 - 10 Days/+-30 hours]

- Learn about cloud technologies.
- Understand the basics of cloud essentials.
- Learn to deploy cloud solutions and infrastructure.
- Apply troubleshooting skills.
- Provide appropriate support.
- Understand the basics of CPU and memory sizing for cloud deployments.
- Troubleshoot security issues, network issues and automation.
- Maintain cloud systems and infrastructure.
- Implement and deploy your own cloud solution.

PENTEST+ COURSE

[Prior Network+ & Security+]

[5 - 10 Days/+-30 hours]

- Explore vulnerabilities & engagement.
- Planning & scoping penetration tests
- Social Engineering & Specialized System Attacks.
- Network-Based attacks and identification.
- Local Host vulnerabilities & exploits.
- Explore Penetration Testing Tools
- Reporting & Communication of appropriate channels.

PRICE: R12900

Assess and implement information security risk in networks.
Understand the basics of networking and security.
Properly & safely diagnose, resolve & document common security & software issues
Apply troubleshooting skills.
Provide and analyse the cybersecurity threats.
Analyse attacks on computing and network environments.
Learn about penetration testing and implementation.
Analyse data collected from security and event logs.
Investigate and react to cybersecurity incidents.
Assess security risks within a given organization.
Apply security measures on assets and networks.
Learn procedures for post-attack techniques.

PRICE: R25800
[R8600 per 20 hours]
+-1 International exams - additional in price: CyberSecurity Analyst Certification

EC-Council route

schoolofit.co.za
Introduction to Ethical Hacking techniques & Actively learn how to scan networks.

Learn CEH methodologies & Understand procedures for threat analysis.

Troubleshoot various security systems & Learn to defend against spyware.

Given a scenario, determine how to defend against different types of attacks.

Learn to evade IDS, Firewalls, and Honeypots, including Social Engineering.

Learn to hack mobile phones, IOS and Android and implement Sql coding.

Implement hacking in cloud computing.

Learn Hacking Wireless Networks & Crack wifi connections.

Learn how digital foot printing works.

Identify different types of cryptography.

Learn to crack passwords.

PRICE: R45600

[R7600 per 20 hours]
