IT FUNDAMENTALS
COURSE [ITF+] [20 hours]

IT CONCEPTS & TERMINOLOGY
- Comprehend notational systems,
- illustrate the basics of computing and explain the value of data and troubleshooting

INFRASTRUCTURE
- Know how to set up and install common peripheral devices to a laptop/PC or secure a basic wireless network

APPLICATIONS & SOFTWARE
- Manage applications software, understand the various components of an operating system
- Explain the purpose of methods of application architecture

SOFTWARE DEVELOPMENT
- Comprehend programming language categories, interpret logic, and
- Understand the purpose of programming concepts

DATABASE FUNDAMENTALS
- Able to explain database concepts, structures, and purpose, as well as
- Understands methods used to interface

SECURITY
- Understand confidentiality, integrity, and
- availability concerns of secure devices and best practice methods

PRICE: R12 900 / $850 / €720

[Full Payment before commencement (no payment plan)]

CYSA+ [Cybersecurity Analyst]
COURSE [2 months/40 hours]

Comptia route

- **Assess** and implement information security risk in networks.
- **Understand** the basics of networking and security.
- **Properly** & safely diagnose, resolve & document common security & software issues
- **Apply** troubleshooting skills.
- **Provide** and analyse the cybersecurity threats.
- **Analyse** attacks on computing and network environments.
- **Learn** about penetration testing and implementation.
- **Analyse** data collected from security and event logs.
- **Investigate** and react to cybersecurity incidents.
- **Assess** security risks within a given organization.
- **Apply** security measures on assets and networks.
- **Learn** procedures for post-attack techniques.

ETHICAL HACKING COURSE

[4 months/80 hours]

EC-Council route

- **Introduction** to Ethical Hacking techniques & Actively learn how to scan networks.
- **Learn** CEH methodologies & Understand procedures for threat analysis.
- **Troubleshoot** various security systems & Learn to defend against spyware.
- **Given** a scenario, determine how to defend against different types of attacks.
- **Learn** to evade IDS, Firewalls, and Honeypots, including Social Engineering.
- **Learn** to hack mobile phones, IOS and Android and implement Sql coding
- **Implement** hacking in cloud computing.
- **Learn** Hacking Wireless Networks & Crack wifi connections.
- **Learn** how digital foot printing works
- **Identify** different types of cryptography
- **Learn** to crack passwords.

PRICE: R43 600 / $2400 / €2400/ £2000

DATA+
COURSE [20 hours]

Data Concepts and Environments
- Boost your knowledge in identifying basic concepts of data schemas and dimensions while understanding the difference between common data structures and file formats.

Data Mining
- Grow your skills to explain data acquisition concepts, reasons for cleansing and profiling datasets, executing data manipulation, and understanding techniques for data manipulation.

Data Analysis
- Gain the ability to apply the appropriate descriptive statistical methods and summarize types of analysis and critical analysis techniques.

Visualization
- Learn how to translate business requirements to create the appropriate visualization in the form of a report or dashboard with the proper design components.

Data Governance, Quality, & Controls
- Increase your ability to summarize important data governance concepts and apply data quality control concepts.
