TABLEAU DEVELOPER

COURSE INFO

[5 DAYS -1 MONTH/20 HOURS]

- Embedding and integrating Tableau visualizations into internal and external web applications (e.g. Salesforce).
- Scripting automation tasks.
- Building web data connections to bring in data from sources without native connectors in Tableau.
- Creating custom data extracts.
- Creating Dashboard Extension add-ins for customized workflows in Tableau.

ABOUT

Tableau is a powerful and fastest growing data visualization tool used in the Business Intelligence Industry. It helps in simplifying raw data in a very easily understandable format. Tableau helps create the data that can be understood by professionals at any level in an organization. It also allows non-technical users to create customized dashboards.
