PC Engineering

A comprehensive 3-month programme covering hardware essentials, networking, and cloud or project specialisation. 1-on-1 online training with a real lecturer.

● Flexible hours

● Commence anytime

● 1-on-1 online with a real lecturer

Learning Objectives

Covered over 60 hours (~3 months).

1 Month 1 (20h) — A+ & Hardware Essentials

2 Month 2 (20h) — N+ (Networking)

3 Month 3 (20h) — Cloud or Project specialisation

Pricing

COURSE PRICE

R32,700

Payment plan: 3 payments of R10,900 per 20 hours

Course Duration & Format

Duration

60 hours (~3 months) — maximum completion time

Payment

Payment plan available: R10,900 × 3 payments

Mode

1-on-1 online, real lecturer, flexible scheduling

Certificate

Certificate of Completion included

Career Prospects

◆ PC Support Technician

◆ IT Field Engineer

◆ Hardware Support Specialist

◆ Desktop Support Engineer

◆ IT Technician

Typical PC Engineering-skilled salary (South Africa)

R180k – R400k / yr

International exam(s) (optional, ~4): contact us to confirm current fee. School of IT handles booking & admin if you choose to sit one.

Get job-ready skills — start your PC Engineering course today.

Network Engineering

Core networking concepts through to enterprise design — OSI/TCP-IP models, IP addressing, VLANs, routing, security fundamentals, and cloud/hybrid networking. 1-on-1 online training with a real lecturer.

● Flexible hours

● Commence anytime

● 1-on-1 online with a real lecturer

🎓 Learning Objectives

Covered over 40 hours (~2 months).

- 1 Core networking concepts, terminology, and the OSI/TCP-IP models
- 2 IP addressing and subnetting (IPv4 and basic IPv6)
- 3 Configuring routers, switches, access points, VLANs, and inter-VLAN routing
- 4 Static/dynamic routing, DNS/DHCP/NTP, firewalls, ACLs and VPNs
- 5 Network monitoring, packet analysis, and troubleshooting
- 6 Cloud and hybrid networking, remote access, and automation basics

💰 Pricing

COURSE PRICE

R28,800

Payment plan: 2 payments of R14,400 per 20 hours

📖 Course Duration & Format

Duration

40 hours (~2 months) — maximum completion time

Data Engineering

Core data engineering concepts through to cloud-based pipelines — ETL/ELT, SQL/NoSQL, data warehousing, Big Data tools, and data governance. 1-on-1 online training with a real lecturer.

● Flexible hours

● Commence anytime

● 1-on-1 online with a real lecturer

🎓 Learning Objectives

Covered over 40 hours (~2 months).

- 1 Data engineering fundamentals and the data lifecycle
- 2 Designing, building and maintaining data pipelines (ETL/ELT)
- 3 SQL and NoSQL databases, data modelling for analytics
- 4 Data warehousing and lakes (Snowflake, Redshift, BigQuery)
- 5 Cloud data platforms (AWS, Azure, GCP), Python, and Big Data tools (Spark, Hadoop)
- 6 Data quality, governance, security and pipeline optimisation

CompTIA Tech+

IT concepts and terminology, infrastructure, applications and software, software development, database fundamentals, and security — the foundational CompTIA certification. 1-on-1 online training with a real lecturer.

• Flexible hours

• Commence anytime

• 1-on-1 online with a real lecturer

Learning Objectives

Covered over 20 hours.

- 1 IT concepts and terminology, computing basics, and troubleshooting
- 2 Infrastructure — setting up peripherals and securing basic wireless networks
- 3 Applications and software — managing applications and OS components
- 4 Software development — programming categories, logic, and concepts
- 5 Database fundamentals and security — confidentiality, integrity, availability

CCST Networking — Cisco Certified Support Technician (Networking)

Cisco's current entry-level networking certification — network technology, network administration, security fundamentals, and troubleshooting for technical support roles. 1-on-1 online training with a real lecturer.

● Flexible hours

● Commence anytime

● 1-on-1 online with a real lecturer

Note: This is Cisco's current entry-level networking credential, replacing the retired Cisco Certified Technician (CCT).

🎓 Learning Objectives

Covered over 20 hours (~1 month).

- 1 Standard networking concepts and terminology
- 2 Network components — routers, switches, access points, cabling
- 3 Addressing and subnet formats
- 4 Endpoint and network device configuration
- 5 Basic security concepts and troubleshooting methodology

Cisco Certified Network Associate (CCNA)

Design, install and support business-critical network switches, routers, and VLANs — troubleshoot LAN/WAN networks and manage Cisco enterprise infrastructure. 1-on-1 online training with a real lecturer.

● Flexible hours

● Commence anytime

● 1-on-1 online with a real lecturer

Prerequisite: CCST Networking course.

Note: As of the February 2026 Cisco certification restructure, CCNA Cybersecurity and CCNA Automation are now also available as Associate-level siblings — see our dedicated Cisco Certifications brochure for the full catalogue.

Learning Objectives

Covered over 20 hours (~1 month).

1 Designing, installing and supporting network switches, routers and VLANs

2 Troubleshooting and supporting LAN/WAN networks

3 Investigating new network technologies for IT infrastructure

4 Managing Cisco enterprise switching and routing infrastructure

5 Networking projects and user support

CCNP Enterprise — Cisco Certified Network Professional (Enterprise)

Complex enterprise network requirements, EIGRP and OSPF routing, BGP operations, and route redistribution for advanced network professionals. 1-on-1 online training with a real lecturer.

● Flexible hours

● Commence anytime

● 1-on-1 online with a real lecturer

Prerequisite: Cisco CCNA course.

Note: Following the February 2026 restructure, CCNP now splits into named tracks (Enterprise, Security, Data Center, Collaboration, Service Provider, Cybersecurity, Automation) — this course covers the Enterprise track. See our dedicated Cisco Certifications brochure for the full catalogue.

🎓 Learning Objectives

Covered over 20 hours (~1 month).

- 1 Understanding complex enterprise network requirements and planning implementation
- 2 EIGRP for Enterprise LAN/WAN architecture and advanced EIGRP features
- 3 OSPF as a scalable routing protocol; routing performance and security
- 4 Configuring and verifying route redistribution
- 5 Planning enterprise-to-ISP connections and configuring BGP operations

CompTIA CloudNetX

CompTIA's new Xpert-tier certification for secure, scalable networking across hybrid cloud environments — designed for senior network professionals managing complex, multi-cloud connectivity. 1-on-1 online training with a real lecturer.

● Flexible hours

● Commence anytime

● 1-on-1 online with a real lecturer

Prerequisite: Cisco CCNP course (or equivalent advanced networking experience) and CompTIA Cloud+.

🎓 Learning Objectives

Covered over 20 hours (~1 month).

- 1 Designing secure, scalable network architecture across hybrid and multi-cloud environments
- 2 Advanced connectivity patterns — VPN, direct connect, and SD-WAN in hybrid deployments
- 3 Network security integration for cloud-to-cloud and cloud-to-on-premises traffic
- 4 Performance optimisation and troubleshooting across complex hybrid networks
- 5 Governance and compliance considerations for multi-cloud networking
