Course Catalogue — 100 Courses

1. SAP S/4HANA Finance (Financial Accounting) — Associate
2. SAP S/4HANA Finance (Management Accounting — Controlling) — Associate
3. SAP S/4HANA Sourcing & Procurement (Materials Management) — Associate
4. SAP S/4HANA Sales & Distribution (SD) — Associate
5. SAP S/4HANA Manufacturing (Production Planning — PP) — Associate
6. SAP S/4HANA Extended Warehouse Management (EWM) — Associate
7. SAP S/4HANA Asset Management (EAM) — Associate
8. SAP S/4HANA Quality Management (QM) — Associate
9. SAP S/4HANA Plant Maintenance (PM) — Associate
10. SAP S/4HANA Treasury and Risk Management — Associate
11. SAP S/4HANA Central Finance — Associate
12. SAP S/4HANA Cloud Implementation with SAP Activate — Consultant
13. SAP S/4HANA Migration & Data Conversion (Migration Cockpit)
14. SAP S/4HANA Embedded Analytics
15. SAP S/4HANA Revenue Accounting & Reporting (RAR)
16. SAP S/4HANA BRIM (Billing & Revenue Innovation Management)
17. SAP BW/4HANA — Data Warehousing & Modelling
18. SAP HANA Administration & Operations
19. SAP HANA Modeling & SQLScript
20. SAP Analytics Cloud (SAC) — Reporting & Story Design
21. SAP Analytics Cloud (SAC) — Planning
22. SAP Datasphere (Data Warehouse Cloud) — Fundamentals
23. SAP BusinessObjects Web Intelligence (WebI)
24. SAP Crystal Reports for Designers
25. SAP Fiori End-User & Navigation
26. SAP Fiori App Configuration for Consultants
27. SAP UI5 / Fiori Development (Frontend)
28. SAP ABAP Programming Fundamentals
29. Advanced ABAP & Performance Optimization
30. ABAP for S/4HANA: CDS Views & ABAP RESTful Programming Model (RAP)
31. SAP Business Technology Platform (BTP) — Overview
32. SAP BTP — Cloud Foundry & Extensions (Developer)
33. SAP Cloud Application Programming Model (CAP) — Developer
34. SAP Integration Suite (CPI) — Developer
35. SAP API Management & Gateway
36. SAP Process Integration (PI/PO) — Legacy Integration
37. SAP SuccessFactors — Employee Central
38. SAP SuccessFactors — Recruiting Management
39. SAP SuccessFactors — Learning (LMS)
40. SAP SuccessFactors — Performance & Goals
41. SAP SuccessFactors — Compensation
42. SAP Ariba — Procurement & Sourcing
43. SAP Ariba — Contracts & Supplier Management
44. SAP Fieldglass — Contingent Workforce Management
45. SAP Concur — Travel & Expense Management
46. SAP C/4HANA Commerce Cloud — Overview (Customer Experience)
47. SAP C/4HANA — Marketing Cloud (Overview)
48. SAP C/4HANA — Sales Cloud (Overview)
49. SAP Customer Data Cloud (Gigya) — Fundamentals
50. SAP Transportation Management (TM) — Consultant
51. SAP Integrated Business Planning (IBP) — Demand Planning
52. SAP IBP — Sales & Operations Planning (S&OP)
53. SAP APO → IBP Migration Topics & Strategy
54. SAP EWM Advanced Topics (Wave, Slotting, RF)
55. SAP Warehouse Management (WM) — Classic (Overview & Transition)
56. SAP Warehouse Management — RF & Mobile Scanning
57. SAP Logistics Execution & Shipping
58. SAP Manufacturing Integration & Intelligence (MII)
59. SAP Plant Connectivity (PCo) & IoT Integration
60. SAP Predictive Analytics & Machine Learning Foundations
61. SAP AI Core & AI Launchpad — Fundamentals
62. SAP Conversational AI — Chatbot Basics
63. SAP Commerce Cloud — B2B Implementation
64. SAP Commerce Cloud — B2C Implementation
65. SAP Solution Manager (SolMan) — Application Lifecycle Management
66. SAP Focused Build & Focused Insights — Agile Delivery
67. SAP Basis Administration — System Administration
68. SAP System Operations & Monitoring
69. SAP Landscape Design & Sizing
70. SAP Performance Tuning & Troubleshooting
71. SAP Database Administration (DBA) for SAP HANA
72. SAP Security Fundamentals — Authorization Concepts
73. SAP Identity Management & Single Sign-On (IAS/IPS)
74. SAP GRC — Access Control
75. SAP GRC — Process Control & Risk Management
76. SAP Data Privacy & GDPR for SAP
77. SAP Audit & Controls for S/4HANA
78. SAP Cloud Security & Multi-Cloud Governance
79. SAP DevOps & CI/CD for SAP (BTP & S/4HANA)
80. SAP Automated Testing & Test Data Management
81. SAP Test Automation with Tricentis Tosca / eCATT
82. SAP UI/UX Design Principles for Fiori
83. SAP User Adoption & Change Management — End User Training
84. SAP Business Process Modeling & Signavio
85. SAP Process Mining & Process Intelligence
86. SAP Sustainability Control Tower — Overview
87. SAP Environment, Health & Safety (EHS)
88. SAP Product Compliance & Dangerous Goods
89. SAP Batch Management & Serialization
90. SAP Licensing & Contract Administration (SAP LA) — Overview
91. SAP Revenue Recognition (IFRS15/ASC606) for S/4HANA
92. SAP Lease Accounting (IFRS16) in S/4HANA
93. SAP Project Systems (PS) — Fundamentals
94. SAP Portfolio & Project Management (PPM)

95. SAP Professional Services Automation (PSA)

96. SAP Grants Management — Public Sector

97. SAP Travel Management — End User & Admin

98. SAP Real Estate Management (RE-FX)

99. SAP Retail — Assortment & Merchandise Management

100. SAP Pricing & Condition Techniques — Advanced

SAP S/4HANA Finance (Financial Accounting) — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Basic accounting knowledge; familiarity with ERP concepts.

Target audience: Finance consultants, accountants, S/4HANA implementers.

Learning objectives: Understand S/4HANA financial accounting architecture and data model; configure core FI modules (GL, AP, AR); perform period-end activities and financial reporting.

Modules

- 1 Introduction to S/4HANA Finance & table model
- 2 General ledger configuration and posting flows
- 3 Accounts payable and accounts receivable processing
- 4 Asset accounting and depreciation
- 5 Period-end closing and reporting (financial statements)
- 6 Integration with Controlling and banking

Assessment: Hands-on configuration lab + end-of-course mock exam.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Finance (Financial Accounting) — Associate course today.

SAP S/4HANA Finance (Management Accounting – Controlling) – Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: FI knowledge recommended.

Target audience: CO consultants, cost accountants.

Learning objectives: Configure cost centers, profit centers, cost element accounting; run cost allocation and profitability analysis.

Modules

- 1 Controlling overview in S/4HANA
- 2 Cost center and internal order configuration
- 3 Profitability Analysis (CO-PA) and margin reporting
- 4 Product costing and cost object controlling
- 5 Integration with FI and logistics processes
- 6 Practical scenarios & performance optimization

Assessment: Case study costing exercise + quiz.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Finance (Management Accounting – Controlling) – Associate course today.

SAP S/4HANA Sourcing & Procurement (Materials Management) — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Basic procurement process awareness.

Target audience: MM consultants, procurement analysts.

Learning objectives: Manage procurement lifecycle, configure purchasing, master data, invoice verification.

Modules

- 1 Procurement process overview in S/4HANA
- 2 Material master, vendor master, pricing procedures
- 3 Purchase requisition to purchase order flows
- 4 Goods receipts, invoice verification, and vendor payment flow
- 5 Inventory management & valuation
- 6 Integration with finance and warehouse modules

Assessment: Procure-to-pay lab + configuration checklist.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

🚀 Get job-ready skills — start your SAP S/4HANA Sourcing & Procurement (Materials Management) — Associate course today.

SAP S/4HANA Sales & Distribution (SD) — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Sales order processing basics.

Target audience: SD consultants, order management users.

Learning objectives: Configure sales order, pricing, delivery and billing; manage customer master data.

Modules

- 1 Sales processes & master data setup
- 2 Sales order processing and item categories
- 3 Pricing determination & condition technique
- 4 Delivery, picking, and shipping integration
- 5 Billing types and revenue posting to FI
- 6 Troubleshooting and performance tips

Assessment: End-to-end SD scenario labs.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Sales & Distribution (SD) — Associate course today.

SAP S/4HANA Manufacturing (Production Planning — PP) — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Manufacturing process familiarity.

Target audience: Production planners, PP consultants.

Learning objectives: Configure material requirements planning, work center, routings, and production orders.

Modules

- 1 PP overview and master data (BOM, routing)
- 2 Work center and capacity planning
- 3 MRP types and planning run configuration
- 4 Production order processing and confirmation
- 5 Subcontracting, repetitive manufacturing and KANBAN basics
- 6 Integration with QM and WM/EWM

Assessment: Create and process production orders in sandbox.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Manufacturing (Production Planning — PP) — Associate course today.

SAP S/4HANA Extended Warehouse Management (EWM) — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Basic warehouse operations knowledge.

Target audience: Warehouse consultants, logistics managers.

Learning objectives: Configure inbound/outbound processes, storage types, waves, and RF/mobile scenarios.

Modules

- 1 EWM architecture and master data
- 2 Inbound process (GR, putaway)
- 3 Outbound process (pick, pack, ship) and wave management
- 4 Slotting & replenishment strategies
- 5 RF/mobile scanner configuration and handling units
- 6 Integration with TM, SD, and S/4HANA core

Assessment: Hands-on EWM inbound/outbound lab.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Extended Warehouse Management (EWM) — Associate course today.

SAP S/4HANA Asset Management (EAM) — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Basic maintenance process knowledge.

Target audience: Maintenance planners and EAM consultants.

Learning objectives: Configure equipment master, maintenance plans, notifications and work orders.

Modules

- 1 EAM overview & master data setup
- 2 Notifications and maintenance order lifecycle
- 3 Preventive maintenance planning and scheduling
- 4 Integration with MRO procurement and inventory
- 5 Reporting & KPIs for asset health

Assessment: Maintenance order creation lab.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Asset Management (EAM) — Associate course today.

SAP S/4HANA Quality Management (QM) — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Basic understanding of inspection processes.

Target audience: Quality engineers, QM consultants.

Learning objectives: Configure inspection plans, lots, quality notifications and usage decisions.

Modules

- 1 QM process flow and master data
- 2 Inspection planning and stock inspection
- 3 Quality notifications and usage decisions
- 4 Integration with procurement and production
- 5 Reporting and audit trails

Assessment: Inspection lot processing exercise.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

[Enrol Now →](#)

SAP S/4HANA Plant Maintenance (PM) — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: General maintenance knowledge.

Target audience: PM consultants, maintenance supervisors.

Learning objectives: Run maintenance cycles, configure equipment & functional location data, and manage breakdowns and work orders.

Modules

- 1 **PM structure and master data**
- 2 **Notification & order management**
- 3 **Preventive maintenance planning**
- 4 **Resource & spare part integration**
- 5 **Analytics for maintenance optimization**

Assessment: Practical PM scenario.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Plant Maintenance (PM) — Associate course today.

SAP S/4HANA Treasury and Risk Management — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Basic finance or treasury knowledge.

Target audience: Treasury analysts and finance consultants.

Learning objectives: Configure cash management, liquidity forecasting, and risk instruments in S/4HANA.

Modules

- 1 Treasury overview and master data
- 2 Cash and liquidity management basics
- 3 Financial instruments and exposures
- 4 Integrations to bank communication and payments
- 5 Reporting for treasury operations

Assessment: Cash management configuration lab.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Treasury and Risk Management — Associate course today.

[Enrol Now →](#)

SAP S/4HANA Central Finance — Associate

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: S/4HANA FI/CO knowledge and landscape awareness.

Target audience: Finance transformation leads, technical consultants.

Learning objectives: Implement Central Finance architecture, mappings, and data replication strategies.

Modules

- 1 Central Finance concept & architecture
- 2 SLT/SDI/Replication setup and mapping rules
- 3 Master data harmonization and mapping exercises
- 4 Post-processing and reconciliation workflows
- 5 Cutover considerations and performance tuning

Assessment: Simulated replication and reconciliation exercise.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Central Finance — Associate course today.

SAP S/4HANA Cloud Implementation with SAP Activate — Consultant

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Project experience or SAP solution knowledge.

Target audience: Project managers, solution architects, consultants.

Learning objectives: Apply SAP Activate methodology for cloud implementations, perform fit-to-standard workshops, manage project tasks.

Modules

- 1 SAP Activate overview & phases (Discover, Prepare, Explore, Realize, Deploy)
- 2 Fit-to-standard workshop facilitation and realization tasks
- 3 Solution validation, delta configuration, and test management
- 4 Cutover planning and post-go-live support processes
- 5 Tools: SAP Cloud ALM, Solution Manager, and test automation basics

Assessment: Project planning workshop and deliverable review.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Cloud Implementation with SAP Activate — Consultant course today.

SAP S/4HANA Migration & Data Conversion (Migration Cockpit)

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Knowledge of master and transactional data.

Target audience: Migration consultants, data leads.

Learning objectives: Use SAP Migration Cockpit and tools to migrate master and transactional data to S/4HANA; handle data mapping, cleansing and validation.

Modules

- 1 Migration strategy and landscape assessment
- 2 Migration Cockpit tool: configuration and templates
- 3 Data mapping & transformation best practices
- 4 Test migrations, reconciliation and cutover tasks
- 5 Performance & error handling during mass loads

Assessment: End-to-end data migration simulation.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Migration & Data Conversion (Migration Cockpit) course today.

SAP S/4HANA Embedded Analytics

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Basic reporting & S/4HANA familiarity.

Target audience: Business analysts, BI consultants.

Learning objectives: Build CDS views, design analytical queries and embedded dashboards using Fiori and analytical tools.

Modules

- 1 Analytics architecture in S/4HANA
- 2 CDS view basics and analytical annotations
- 3 Building queries and KPI tiles in Fiori
- 4 Consumption in SAC and integration points
- 5 Performance considerations and security for analytics

Assessment: CDS view + simple dashboard assignment.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Embedded Analytics course today.

SAP S/4HANA Revenue Accounting & Reporting (RAR)

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Revenue accounting background.

Target audience: Finance consultants, revenue recognition specialists.

Learning objectives: Configure RAR components, understand settlement and reporting for complex revenue models.

Modules

- 1 RAR principles and legal requirements (IFRS 15)
- 2 Configuration of contracts and revenue elements
- 3 Settlement processes into finance ledgers
- 4 Reconciliation and reporting tasks
- 5 Integration with billing (BRIM) and SD

Assessment: Configuration and settlement exercise.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA Revenue Accounting & Reporting (RAR) course today.

[Enrol Now →](#)

SAP S/4HANA BRIM (Billing & Revenue Innovation Management)

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Billing or subscription billing knowledge helpful.

Target audience: Billing consultants, revenue management teams.

Learning objectives: Configure subscription billing flows, convergent charging, invoicing and revenue recognition integration.

Modules

- 1 BRIM architecture & components (CPQ, CDR, CLM, Convergent Charging)
- 2 Customer contract lifecycle and billing plans
- 3 Convergent Invoicing configuration and mapping to FI
- 4 Mediation & rating use cases (telecom / utilities examples)
- 5 Reporting, disputes and dunning flows

Assessment: BRIM scenario configuring contract to invoice.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP S/4HANA BRIM (Billing & Revenue Innovation Management) course today.

SAP BW/4HANA — Data Warehousing & Modelling

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: SQL and data modelling basics.

Target audience: BW developers, data engineers, BI consultants.

Learning objectives: Model dataflows, create ADSO objects, and design transformation logic in BW/4HANA.

Modules

- 1 BW/4HANA architecture and EDW concepts
- 2 ADSO, InfoObjects and composite providers
- 3 Data extraction and transformation best practices
- 4 Query design and optimization for reporting tools
- 5 Integration with SAC and Datasphere

Assessment: Build a small datawarehouse pipeline and reporting query.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP BW/4HANA — Data Warehousing & Modelling course today.

SAP HANA Administration & Operations

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Linux basics and DB fundamentals.

Target audience: DBAs and system administrators.

Learning objectives: Install, configure, monitor and backup SAP HANA; manage users and security at DB level.

Modules

- 1 HANA architecture and installation overview
- 2 Backup & recovery strategies and tools
- 3 Performance monitoring and tuning essentials
- 4 User/role management and security best practices
- 5 Patching and lifecycle management for HANA systems

Assessment: Admin exercises on system monitoring and recovery simulation.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP HANA Administration & Operations course today.

SAP HANA Modeling & SQLScript

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: SQL knowledge and data modelling basics.

Target audience: Data modelers and developers.

Learning objectives: Develop calculation views, use SQLScript, and optimize models for analytical performance.

Modules

- 1 Calculation views and semantic layers
- 2 SQLScript procedures and performance considerations
- 3 CDS vs calculation views: when to use what
- 4 Debugging and optimization of models
- 5 Integration with ETL and reporting consumers

Assessment: Create optimized calculation views for given scenarios.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP HANA Modeling & SQLScript course today.

SAP Analytics Cloud (SAC) — Reporting & Story Design

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Basic BI/reporting knowledge.

Target audience: Report designers, analysts.

Learning objectives: Build stories, data models, and interactive dashboards in SAC; publish and consume analytics securely.

Modules

- 1 SAC overview, data import and live connections
- 2 Model creation and calculated measures
- 3 Story designer: visualizations, filters and interactivity
- 4 Commentary, collaboration and scheduling exports
- 5 Security roles and sharing best practices

Assessment: Build a multi-page story with drilldowns.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP Analytics Cloud (SAC) — Reporting & Story Design course today.

[Enrol Now →](#)

SAP Analytics Cloud (SAC) — Planning

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Planning or budgeting experience recommended.

Target audience: Planners, finance analysts, FP&A.

Learning objectives: Configure planning models, writeback, allocation and driver-based planning in SAC.

Modules

- 1 Planning model architecture and input templates
- 2 Data actions, advanced formulas and processes
- 3 Allocations, writeback and versioning strategies
- 4 Integration with S/4HANA and BW/4HANA for live planning
- 5 Rolling forecasts and scenario management

Assessment: Create a budget planning model and perform forecast simulations.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP Analytics Cloud (SAC) — Planning course today.

SAP Datasphere (Data Warehouse Cloud) — Fundamentals

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Data modelling basics and cloud concepts.

Target audience: Cloud data engineers, BI architects.

Learning objectives: Model semantic layers in Datasphere, create spaces, and integrate cloud and on-prem sources.

Modules

- 1 Datasphere architecture and tenant setup
- 2 Space models, virtual tables and data flow
- 3 Data ingestion patterns and transformations
- 4 Governance, access control and lineage
- 5 Integration with SAC and HANA cloud connectors

Assessment: Build a small enterprise data model and report connector.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

🚀 Get job-ready skills — start your SAP Datasphere (Data Warehouse Cloud) — Fundamentals course today.

SAP BusinessObjects Web Intelligence (WebI)

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Report design basics.

Target audience: Report authors and BI analysts.

Learning objectives: Create WebI documents, universes, and parameterized reports.

Modules

- 1 BO architecture and web interface basics
- 2 Query building and result set handling in WebI
- 3 Report formatting, charts and variables
- 4 Scheduling, bursting and security setup
- 5 Troubleshooting common WebI issues

Assessment: Build a parameterized report and schedule delivery.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

SAP Crystal Reports for Designers

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R13,900****DURATION****10 hrs**

Prerequisites: Basic report layout skills.

Target audience: Report designers needing pixel-perfect layouts.

Learning objectives: Design pixel-perfect reports, use formulas and integrate with SAP data sources.

Modules

- 1 Crystal Reports interface and data connections
- 2 Formatting, grouping and subreports
- 3 Formula fields, parameters, and conditional formatting
- 4 Exporting and distribution formats

Assessment: Design a formatted report with grouped sections.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

SAP Fiori End-User & Navigation

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE

R13,900

DURATION

10 hrs

Prerequisites: None.

Target audience: Business users moving to Fiori UX.

Learning objectives: Navigate Fiori apps, personalize tiles, use search & filters and run basic tasks.

Modules

- 1 **Fiori launchpad and tile navigation**
- 2 **App personalization and settings**
- 3 **Use cases: approvals, invoices, and purchase orders**
- 4 **Launchpad search & notifications**

Assessment: Interactive exercises using a Fiori demo tenant.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP Fiori End-User & Navigation course today.

SAP Fiori App Configuration for Consultants

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Basic SAP functional knowledge.

Target audience: Technical consultants and functional leads.

Learning objectives: Configure Fiori launchpad, manage catalogs/roles, and adapt standard apps using key user tools.

Modules

1 Fiori architecture and launchpad configuration

2 Catalogs, groups and role assignments

3 Key user adaptation & UI personalization tools

4 App configuration and troubleshooting

5 Performance and transport considerations

Assessment: Configure a launchpad, create a catalog and assign roles.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP Fiori App Configuration for Consultants course today.

SAP UI5 / Fiori Development (Frontend)

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: JavaScript/HTML/CSS basics.

Target audience: Frontend developers building SAP UI5 apps.

Learning objectives: Build custom Fiori apps using UI5 controls, OData consumption and deployment to BTP.

Modules

- 1 UI5 fundamentals and MVC architecture
- 2 Controls, data binding and fragments
- 3 Consuming OData and handling models
- 4 Theming, accessibility and i18n
- 5 Deployment to SAP BTP and testing best practices

Assessment: Build and deploy a small UI5 application connected to an OData service.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP UI5 / Fiori Development (Frontend) course today.

SAP ABAP Programming Fundamentals

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Basic programming logic recommended.

Target audience: ABAP developers and technical consultants.

Learning objectives: Write ABAP programs, work with reports, function modules and basic performance guidelines.

Modules

- 1 ABAP development environment and data dictionary
- 2 Procedural and modular programming constructs
- 3 Reports, ALV grids and basic forms integration
- 4 Debugging, transports and unit testing in ABAP
- 5 Introduction to OO ABAP and performance hints

Assessment: Create a report and a function module with tests.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP ABAP Programming Fundamentals course today.

Advanced ABAP & Performance Optimization

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: ABAP fundamentals.

Target audience: Senior ABAP developers and architects.

Learning objectives: Optimize ABAP for performance, use buffering, SQL tuning, and implement clean, maintainable code patterns.

Modules

- 1 SQL performance analysis and index strategies
- 2 Buffering, internal tables, and garbage collection
- 3 Code inspector, ATC and unit testing best practices
- 4 Memory and runtime diagnostics, execution plans
- 5 Refactoring to OO ABAP and reusability patterns

Assessment: Performance tuning exercise on a sample program.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your Advanced ABAP & Performance Optimization course today.

ABAP for S/4HANA: CDS Views & ABAP RESTful Programming Model (RAP)

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: ABAP basics and S/4HANA knowledge.

Target audience: ABAP developers building S/4 extensions.

Learning objectives: Build CDS views, use annotations for OData, and create services using RAP.

Modules

- 1 CDS view anatomy and CDS associations
- 2 Annotations for UI and analytical consumption
- 3 RAP architecture and behavior definitions
- 4 Service exposure, testing and deployment on ABAP platform
- 5 Security and performance aspects for CDS/RAP artifacts

Assessment: Build a CDS view and expose a simple RAP service.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

🚀 Get job-ready skills — start your ABAP for S/4HANA: CDS Views & ABAP RESTful Programming Model (RAP) course today.

SAP Business Technology Platform (BTP) — Overview

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Cloud concepts awareness.

Target audience: Architects, consultants, developers.

Learning objectives: Understand BTP services, extension options, and integration patterns with S/4HANA and cloud apps.

Modules

- 1 BTP architecture (CF & Neo) and services catalog
- 2 Extension paradigms (side-by-side and in-app)
- 3 Authentication, connectivity and destinations
- 4 Useful services: XSUAA, Connectivity, Workflow, Kyma & Event Mesh
- 5 Governance and lifecycle on BTP

Assessment: Design an extension architecture for a small use case.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP Business Technology Platform (BTP) — Overview course today.

SAP BTP — Cloud Foundry & Extensions (Developer)

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Developer background (Node.js, Java) and cloud basics.

Target audience: Developers building cloud extensions.

Learning objectives: Build, test and deploy applications on Cloud Foundry, use BTP services, and manage credentials and bindings.

Modules

- 1 Cloud Foundry basics and CLI usage
- 2 Application development with Node.js/Java and service bindings
- 3 Using SAP XSUAA for auth and Connectivity for destinations
- 4 Persisting data with HANA Cloud and using eventing
- 5 CI/CD pipelines and containerization basics (optional Kyma intro)

Assessment: Deploy a small microservice that uses BTP services.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP BTP — Cloud Foundry & Extensions (Developer) course today.

SAP Cloud Application Programming Model (CAP) — Developer

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: JavaScript/Node.js and basic DB knowledge.

Target audience: Developers building business apps on SAP BTP.

Learning objectives: Use CAP to define domain models, implement services and expose OData endpoints.

Modules

- 1 CAP fundamentals and project structure
- 2 CDS-based domain modeling and service definitions
- 3 Implementing handlers, validations and transactions
- 4 Persistence to HANA and testing locally
- 5 Deployment to BTP and service consumption by UI5 frontends

Assessment: Build a CAP service with sample data and tests.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP Cloud Application Programming Model (CAP) — Developer course today.

SAP Integration Suite (CPI) — Developer

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R32,700****DURATION****40 hrs**

Prerequisites: Basic integration concepts.

Target audience: Integration specialists, middleware developers.

Learning objectives: Design and deploy integration flows, use adapters, map payloads and manage monitoring.

Modules

- 1 **CPI architecture and iFlow building basics**
- 2 **Connectors/adapters and security (OAuth, basic auth)**
- 3 **Mapping, scripting and message transformations**
- 4 **Error handling, retry strategies and monitoring**
- 5 **Performance, scalability and deployment options**

Assessment: Build an iFlow integrating S/4HANA and a cloud app.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP Integration Suite (CPI) — Developer course today.

SAP API Management & Gateway

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: REST API knowledge.

Target audience: API architects, integration consultants.

Learning objectives: Publish, secure and monetize APIs; design API proxies and policies.

Modules

- 1 API management components and concepts
- 2 Designing API proxies and applying policies
- 3 Security: OAuth2, JWT and key management
- 4 Analytics, quota management and lifecycle operations
- 5 Portal and developer experience basics

Assessment: Create a secured API proxy and apply traffic policies.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP API Management & Gateway course today.

SAP Process Integration (PI/PO) — Legacy Integration

1-on-1 online training with a real lecturer · MS Teams / Google Meet · Start anytime

PRICE**R22,800****DURATION****20 hrs**

Prerequisites: Integration fundamentals.

Target audience: PI/PO consultants maintaining classic landscapes.

Learning objectives: Configure integration scenarios, mappings and the ESR/ID repository, and monitor messages.

Modules

- 1 **PI/PO architecture and components (ESR, Adapter Engine)**
- 2 **Designing mappings and message protocols**
- 3 **Configuring communication channels and scenarios**
- 4 **Monitoring, troubleshooting and performance tuning**
- 5 **Migration considerations to CPI (comparison)**

Assessment: Configure an integration scenario with mapping.

Note: Full payment before commencement (no payment plan) · SAP certification exams are optional and billed separately at the exchange rate when booked.

 Get job-ready skills — start your SAP Process Integration (PI/PO) — Legacy Integration course today.
