SCHOOL OF IT · WEB DEVELOPMENT

Learn PHP. Introduction & Advanced.

Practical, live 1-on-1 PHP training. Start from the basics, then build a working database-driven web application.

Live 1-on-1 online | Flexible scheduling | Hands-on coding in every session | Certificate of completion

Two courses, one clear path

PHP powers a large share of the web, including WordPress and many business systems. Take the 10-hour Introduction to learn the language, then the 20-hour Advanced course to build real, structured applications with a database. Each course is taught live and one-on-one by your own personal lecturer.

LEVEL 1 · BEGINNER

Introduction to PHP

R14,900

10 HOURS · ONCE-OFF · NO VAT

WHO IT'S FOR

- Beginners with basic computer skills
- Basic HTML knowledge is helpful, not essential

YOU WILL LEARN TO

- Write and run PHP scripts on a local server
- Use variables, data types and operators
- Control flow with conditions and loops
- Write reusable functions
- Work with arrays and strings
- Process HTML form input safely

LEVEL 2 · INTERMEDIATE TO ADVANCED

Advanced PHP

R18,900

20 HOURS · ONCE-OFF · NO VAT

WHO IT'S FOR

- Anyone who has completed Introduction to PHP, or has equivalent PHP basics

YOU WILL LEARN TO

- Structure code with object-oriented PHP
- Use MySQL through PDO with prepared statements
- Build full create, read, update, delete (CRUD) features
- Handle sessions, login and password hashing
- Validate input and apply core security practices
- Organise code with namespaces and Composer

10 + 20	1-on-1	Your time	Hands-on
